WORK EXPERIENCE

Knowles Training Institute (The Umonics Method)

Singapore (Remote)

IT Intern / Group 1 Team Leader

January 26, 2026 – May 22, 2026

- Edited and formatted PowerPoint presentation decks for multiple educational training modules.
- Reviewed and refined scripts for digital training content using Google Gemini for accuracy and synchronization.
- Generated AI voiceovers using Inworld Portal for verified training scripts.
- Executed multi-track video editing using CapCut to assemble final digital learning packages.
- Performed peer quality assurance reviews on outputs submitted by fellow interns.
- Served as Group 1 Team Leader — assigned tasks, gathered daily reports, and compiled consolidated outputs.
- Completed 640 hours of internship.

TIPID Computer Cabanatuan

Cabanatuan City, Nueva Ecija, Philippines

After Sales Service Staff

March 2018 – November 2018

- Provided technical assistance and after-sales support to customers, including troubleshooting, diagnostics, and maintenance of computer units and peripherals.
- Assisted in monitoring repair requests, managing service records, and coordinating with suppliers for replacement parts and warranty claims.
- Ensured customer satisfaction by addressing technical issues promptly and maintaining quality service.
- Recognized for reliability, efficiency, and attention to detail in providing technical and customer support.

ACADEMIC PROJECTS

Rental and Administration System for JMTC Transport Service with Maintenance Monitoring

(IT Project) January 2025 – December 2025

Front-End and Back-End Developer, QA Tester

- Developed and integrated front-end and back-end modules for the JMTC Car Rental System, including vehicle management, customer reservations, and admin control features.
- Conducted testing and debugging to ensure system reliability, accurate rental processing, and smooth user experience.
- Assisted in designing and optimizing the MySQL database schema for managing vehicles, reservations, and user data.
- Collaborated with teammates in collecting client feedback and presenting system demonstrations during development phases.
- Tech Stack: React (Vite), Tailwind CSS, JavaScript, PHP, MySQL
- Live: <https://jmtc.netlify.app/login>
